

Tausif Ibne Iqbal

Aspiring Engineering Student

Tokyo, Japan | Email | Linkedin | Github | Web Portfolio

The University of Tokyo Class of 2028, Majoring in Environmental Science. Interested in Electronics and Computers.

Education

The University of Tokyo

- Majoring in Environmental Science
- Club - University of Tokyo Formula Factory (11/2024-09/2025)

Professional Experience

- (01/2024 – 08/2024) Chemistry Teaching Assistant at a Cram School in Dhaka.
- (08/2025 – Present) English Tutor at E-Sitter
- (10/2025 – 09/2026) Research Intern at Delaunay Lab at the School of Engineering, UTokyo
- (10/2025 – Present) English Tutor at CAWK, UTokyo
- (06/2026 – Present) CTO at ResearchIn

Areas of Expertise

• Electronics • Embedded System • Python • C# • Web Development • MATLAB • SQL • Machine Learning • Data Science • Rstudio • Photo Editing • Video Editing • Git • Github • Docker • Network Administration • Cloud Computing

Projects

Tokyo Cool Route – Tokyo Open Data Hackathon 2026

- Built a web application for the People of Tokyo during summer.
- Shows nearby places to cool: Conveniences Stores, Water Stations, Parks based on location
- Shows cooler paths with more shades. Works anywhere inside of Tokyo.

AI Weather Forecaster

- Built a Weather Forecaster using RNN LSTM Model.
- Built a Backend Server using Fast API to display the weather on the web

Embedded System

- Built a custom Quadcopter using Arduino as the Flight Controller
- A Remote-Controlled Car built using Arduino whose speed can be controlled
- Built another version with Accelerometer making it a gesture-controlled car

AI Puzzle Solver

- Created an 8 Box Puzzle Game
- Used 8 different search algorithms to automate the game and did a performance analysis
